## DETAILED ACTION

### *Election/Restrictions*

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 37-49 and 65, drawn to an immortalized cell line and a method for detecting HIV.

Group II, claim(s) 50-62, drawn to a method of determining HIV sensitivity to a compound.

Group III, claim(s) 63 and 64, drawn to a method for determining HIV viral titers.

Group IV, claim(s) 66-75, drawn to an immortalized cell line comprising an amplicon gene.

Group V, claim(s) 76-82, drawn to a method of amplifying HIV.

Group VI, claim(s) 83, drawn to a method of amplifying HIV by further contacting another cell line.

Group VII, claim(s) 85 and 86, drawn to a method of isolating HIV viruses.

The inventions listed as Groups I-VII do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The special technical feature of group I is an immortalized cell line comprising specific receptors. The first group sharing the special technical feature of group I is drawn to a first method of using the cell line to detect HIV. Since groups II-VII do not share the special technical feature of group I, the claims lack unity of invention.

Group II is drawn to a second method of using the first product.

Group III is drawn to a third method of using the first product.

Group IV is drawn to a second product since it is structurally and functionally different from the first product.

Group V is drawn to a first method of using the second product.

Group VI is drawn to a second method of using the second product.

Group VII is drawn to a third method of using the second product.

Art Unit: 1648

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
